Illinois River Road Geocaching Series Coordinates

Additional Information for Multi-caches	GC2TVGM Middle East Conflicts																																				
	<p>The coordinates will take you to a marker deep inside Illini State Park. Parking is just a few feet away. Once there you, will need to read the plaque in order to find your quarry. First determine how many times the trees planted here are mentioned in the inscription(This equals A).Next look for how many flowers appear on the plaque.(This equals B) How many petals are on one flower? (This equals C) Now $C-B=D$, $C+A=E$ and $C+D=F$. How many times does the word soldier appear on the plaque? (This equals G) From your original North Coordinates subtract .DAE and from the West Coordinates subtract G.BFD.</p>																																				
	GC2V3AM Buffalo Rock																																				
	<p>The coordinates will take you to a sign which you must investigate in order to find your quarry. First, Determine how many animals are present here. (A) Then determine how many acres (B) can feed one animal for how many days. (C,D,E). Then get the numbers for the minimum and maximum weights of the female listed there. (F,G,H, and I,J,K,L) From your original coordinates, add F plus J and multiply by ten. Then subtract this number from your North Coordinates. Next subtract (.JEA) from your West coordinates. Proceed to the new waypoint and prepare to project a Waypoint after taking in the beauty of the location. Project your waypoint GCB feet and CC degrees. At this point you need to use your geo-senses to find the third stage which holds the final coordinates.</p>
